PROFILE

Full-stack engineer with 2 years of experience developing production web applications, streaming platforms, and real-time web games at CeylonX and D B International Technology. Work spans **NestJS** and **Node.js** backend services, **React** and **Next.js** frontends, and **Cocos Creator** game clients, backed by **PostgreSQL**, **MySQL**, and **MongoDB** on **AWS**.

EDUCATION

University of Ruhuna — **2020 – Dec. 2025**
Bachelor of Computer Science — *Matara, Sri Lanka*

Rahula College Matara
GCE Advanced Level – Mathematics: A | Physics: C | Chemistry: C — *Matara, Sri Lanka*

WORK EXPERIENCE

D B International Technology — **Apr. 2025 – Present**
Associate Software Engineer — *Sri Lanka*

- Contributed to the **Digital Scratch Card** ticket game — built a ticket-generation engine with weight-table validation producing exact winning and losing distributions to protect RTP; extended into a batch pipeline that generated ~130M tickets into **PostgreSQL**. *NestJS, TypeORM, Cocos Creator.*
- Contributed to a **Gaming Platform** with a micro-service backend — API gateway fronting account and lobby services over **RabbitMQ**, deployed on **Kubernetes**; worked on auth proxying, lobby routing, and edge rate-limiting.
- Contributed to the **Gaming Platform** frontend — a **Next.js** + **Tailwind CSS** player client (lobby, wallet, account) and a separate admin panel, in **TypeScript**, consuming the gateway APIs.
- Contributed to **Chicken Road Crash**, a real-time multiplier crash game — built the **Cocos Creator** game client using a Finite State Machine (FSM) architecture; the **NestJS** backend broadcast round state over **Socket.IO** with **RabbitMQ** for event fan-out.

CeylonX Corporation — **Dec. 2024 – Mar. 2025**
Associate Software Engineer — *Sri Lanka*

- Contributed to **Susila**, a Sri Lankan subscription streaming platform with a **React** client and **Node.js** API; delivered video over **HLS (m3u8)** with **Vimeo** as origin, integrated **Stripe** for subscriptions and **Firebase Cloud Messaging** for push.
- Contributed to the **CeylonX corporate website and admin portal** — a **React**/**Three.js** frontend with a **Node.js**/**Express** and **MongoDB** API, **TinyMCE** admin for non-technical editors; deployed on **AWS** with GitHub-triggered CI/CD.

CeylonX Corporation — **Jun. 2024 – Dec. 2024**
Intern Software Engineer — *Sri Lanka*

- Contributed to **Rainbow Swimming Club's online-payment app** — a **React** + **MUI** client with a **Node.js**/**Express** and **MySQL** backend; implemented the full **PayHere** MD5-signed redirect and notify-webhook flow with signature verification, idempotent lookups, and printable receipts.
- Contributed features and maintenance to a production **restaurant POS system** running at Iluk Restaurant & Bar and Savour Street — worked across the **React** frontend and **Node.js** backend APIs. Promoted to Associate after 6 months.

PROJECTS

NestJS Microservices: API Gateway + Auth + User | *NestJS, TypeScript, RabbitMQ, PostgreSQL, Redis*

- Self-initiated 3-service streaming-platform backbone over RabbitMQ with dead-letter queues, idempotency, and domain-event fan-out; gateway with per-service circuit breakers, Redis caching, Prometheus metrics, and Jaeger tracing.
- RS256 JWT (15-min access + 7-day opaque refresh), Argon2id hashing, device-fingerprinted session-reuse detection, per-endpoint rate limits, account lockout.
- API Gateway | Auth Service | User Service

TECHNICAL SKILLS

Languages: TypeScript, JavaScript
Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Node.js, NestJS, Cocos Creator
Databases: PostgreSQL, MongoDB, MySQL, Firebase
Infrastructure & Cloud: AWS, Docker, CI/CD (GitHub Actions), RabbitMQ, Redis, Linux, macOS, Windows
Tools: Figma, Postman, Trello
Working Knowledge: Java, C#, C, PHP, Spring Boot, ASP.NET Core, Laravel, Kubernetes, Kafka, MS SQL, Unity, Godot, Networking
