PROFILE

Full-stack engineer with 2 years of experience developing production web applications, streaming platforms, and real-time web games at CeylonX and D B International Technology. Work spans **NestJS and Node.js** backend services, **React and Next.js** frontends, and **Cocos Creator** game clients, backed by **PostgreSQL, MySQL and MongoDB** and **AWS**.

EDUCATION

University of Ruhuna — **2020 – Dec. 2025**
Bachelor of Computer Science — *Matara, Sri Lanka*

Rahula College Matara
GCE Advanced Level – Mathematics: A | Physics: C | Chemistry: C — *Matara, Sri Lanka*

National Photographic Art Society of Sri Lanka
Diploma in Photography

WORK EXPERIENCE

D B International Technology — **Apr. 2025 – Present**
Associate Software Engineer — *Sri Lanka*

- Full-stack engineer on a team developing web-based gaming platforms and casino games.
- Contributed to the **Digital Scratch Card** ticket game across backend and game client — built a ticket-generation engine with weight-table validation that produced exact winning and losing distributions to protect RTP, regenerating on validation failure and returning tickets instantly to the player; extended into a batch pipeline that generated ~**130M** tickets into **PostgreSQL.** ***NestJS, TypeORM, PostgreSQL, Cocos Creator.***
- Contributed to a **Gaming Platform** with a micro-service backend — an API gateway fronting separate account and lobby services over **RabbitMQ**, deployed on **Kubernetes** for concurrent players; worked on auth proxying, lobby routing (games, vendors, categories), and edge rate-limiting. ***NestJS, RabbitMQ, PostgreSQL, Kubernetes.***
- Contributed to **Chicken Road Crash**, a real-time multiplier crash game where players bet and cash out before a live multiplier crashes — built the **Cocos Creator** game client using a Finite State Machine (FSM) architecture, calling backend endpoints via the built-in Fetch API for bet creation, crash-point checks, cash-outs, and auth; the **NestJS** backend broadcast round state over **Socket.IO** with **RabbitMQ** for event fan-out. ***NestJS, Socket.IO, RabbitMQ, PostgreSQL, Cocos Creator.***

CeylonX Corporation — **Dec. 2024 – Mar. 2025**
Associate Software Engineer — *Sri Lanka*

- Full-stack engineer on a team developing subscription-based streaming platforms and corporate web products.
- Contributed to **Susila**, a Sri Lankan subscription streaming platform, with a **React** web client, **Node.js** API, and an admin panel for catalog and subscription management; delivered video over **HLS (m3u8)** with **Vimeo** as the origin to scale to many concurrent viewers, and integrated **Stripe** for recurring subscriptions and **Firebase Cloud Messaging** for push notifications.
- Contributed to the **CeylonX corporate website and admin portal** — a **React** marketing site with a **Three.js** 3D globe and animated sections, backed by a **Node.js**/**Express** and **MongoDB** API covering blog, portfolio, careers, testimonials, and project requests; added a **TinyMCE** admin so non-technical editors could manage all content themselves.
- Deployed services to **AWS** with GitHub-triggered CI/CD, owning pre-prod to prod rollouts end-to-end.

CeylonX Corporation — **Jun. 2024 – Dec. 2024**
Intern Software Engineer — *Sri Lanka*

- Full-stack intern across production client projects using React.js, Node.js, MongoDB, MySQL, Firebase, and PayHere.

- Contributed to **Rainbow Swimming Club's online-payment app** end-to-end — a **React** + **MUI** client with a **Node.js**/**Express** and **MySQL** backend that lets members pay membership and class fees online through **PayHere** (Sri Lanka's major payment gateway); implemented the full MD5-signed redirect and server-to-server notify-webhook flow with signature verification, status-code checks, idempotent success lookups, admin notifications, and printable receipts.
- Contributed features and maintenance to a production **restaurant POS system** running at Iluk Restaurant & Bar and Savour Street — worked across the **React** frontend, admin dashboard, and **Node.js** backend APIs for order entry, menu management, and auth.

PROJECTS

NestJS Microservices: API Gateway + Auth + User | *NestJS, TypeScript, RabbitMQ, PostgreSQL, Redis*

- Self-initiated for a streaming-platform backbone — API gateway fronting independent Auth and User services over **RabbitMQ**, idempotency keys, and domain-event fan-out; per-service **circuit breakers**, exponential-backoff retries, and **Redis** caching.
- **RS256 JWT** , **Argon2id** password hashing, **device fingerprinting** with session-family token-reuse detection, per-endpoint **rate limiting**, and account lockout; **Prometheus** metrics + **Jaeger** distributed tracing.
- API Gateway | Auth Service | User Service

Home Cinema — E-commerce Streaming App | *React, Vite, TypeScript, Node.js, Firebase, HLS*

- Full-stack movie e-commerce platform — users purchase individual titles and stream them over HLS. **ReactJS + TypeScript client, Node.js API with Firebase** and **Stripe** for payment handling, and a separate ReactJS admin panel for catalog, payment, and user management.
- Frontend | Backend | Admin Panel

Online HLS Video Player | *Next.js, TypeScript, HLS.js, Vercel*

- Browser-based HLS video player built on **Next.js + HLS.js** that streams **.m3u8** manifests with adaptive playback.
- GitHub Repository

TECHNICAL SKILLS

Languages: TypeScript, JavaScript
Frameworks & Libraries: React.js, Next.js, Node.js, NestJS
Databases: PostgreSQL, MongoDB, MySQL, Firebase
Infrastructure & Cloud: AWS, Docker, CI/CD (GitHub Actions), RabbitMQ, Redis, Linux, macOS, Windows
Game Development: Cocos Creator
Tools: Postman, Figma, Trello
Working Knowledge: Spring Boot, ASP.NET Core, Laravel, PHP, Kubernetes, Kafka, Unity, Godot, Networking

CERTIFICATIONS

AWS Educate – Introduction to Cloud | *Amazon Web Services*

- View Credential on Credly

LEADERSHIP & ACTIVITIES

Science Faculty Football Team **2023**
Captain *University of Ruhuna*

- Led the faculty squad and also represented the University of Ruhuna football team at **SLUG XIV 2023** (Sri Lanka University Games).

Science Faculty Sports Club **2023 – 2024**
Senior Editor *University of Ruhuna*

- Led end-to-end editorial workflow for club publications during the 2023–2024 academic year, overseeing content planning, commissioning, review, and timely delivery across the Sports Club calendar.
